Visual Studio Code, Expo, Git, Prettier, ESLint, Xcode

📁 Projects

CryptOS, React Native - Firebase ⬈
- Developed a final project for bootcamp that displays real-time prices, charts, and news of various cryptocurrencies
- Used React Native for front-end development and Firebase for back-end development
- Worked in a team of two developers using Agile methodology

CodeTalks, React Native - Firebase ⬈
- Developed a project called CodeTalks that allows users to join chat rooms and start chatting with other users. Users can also create chat rooms. Used Firebase for the backend.

Marvel App, React Native - Firebase ⬈
- Developed a Marvel App that allows users to sign in and see stories, characters, comics, events, creators, and series.

Expense Tracker App, React Native ⬈
- Developed an expense tracker app that allows users to follow their expenses, take notes and save the date.

Other projects on My GitHub profile ⬈
